BREAKING NEWS - LAWS RECENTLY PASSED REQUIRE POLITICAL PARTIES TO HAVE A MINIMUM OF 1500 MEMBERS

Leading up to the next Federal election, the Government has tightened its grip on power by recently passing laws requiring non-parliamentary political parties to have a minimum 1500 members in order to remain registered. This will jeopardize smaller parties wishing to enter the political arena and maintain democracy in this country.

The No5G Party is committed to ensuring the current government and telecommunication companies are held accountable when it comes to electromagnetic radiation-safe outputs. There are safety measures that currently need addressing for the delivery of safe telecommunication technology across Australia. The roll-out of 5G has not been sufficiently tested for human, wildlife and plant health.

THE NO5G PARTY NEEDS MORE MEMBERS to stay in the game and to continue the pledge to protect you, your health and your freedom.

THE No5G PARTY'S PLEDGE TO BRING BACK LIABILITY INSURANCE OF \$750M PER SATELLITE And Challenge the Safety of 5G

A moratorium on 5G telecommunications satellites flying over Australian airspace is required until it's established that electromagnetic radiation beaming down to Earth does not pose a risk of harm to health, property and privacy. The liability insurance of \$750 million per satellite (as was provided in the recently repealed Space Activities Act (Cth), needs to be reinstated to ensure that any property or health damage caused to Australian citizens is adequately covered by compensation insurance.

LAWSUIT AGAINST SPACE X – Starlink Satellites

Healthy Heavens Trust Initiative involves a team of international lawyers (the Balance Group) who have filed a US lawsuit against Space X. Raymond Broomhall the leader of the No5G Party is one of the petitioners. Watch this space!

Millimetre Waves Trigger the Activation of Dormant Viruses

60-120 GHz (5G range) may influence macromolecules in biological systems, altering cell division and virus activation according to the [Environmental Health Criteria 16](#) World Health Organisation (1981).

They have known this for 40 years!
