

LET'S PROTECT LIFE AND FREEDOM

# 26,000,000,000 reasons to say no to 5G

The 26GHz frequency band is being rolled-out in Australia for the next phase of the 5G network that will cause non-ionising millimeter wave radiation to penetrate our bodies through the skin and tissue at 26 billion pulses per second.

---

Penetrating our bodies without our informed consent is criminal assault.

# get up to speed with 5G dangers

- ✘ Scientific consensus is out that 5G technology is not safe.
- ✘ The Australian safety standard for Limiting Exposure to Radiofrequency Fields is not a sufficient buffer to protect our health.
- ✘ There IS sound medical and scientific evidence and legal precedence set by courts in Australian jurisdictions and around the world that the penetration of non-ionising electromagnetic radiation (e.g. 3G, 4G, Wi-Fi, SMART meters) poses an extreme risk of harm to our health.
- ✘ 26GHz millimetre waves have never been used for consumer and public use. Non-ionising radiation CAN cause harm.
- ✘ Australian Government has turned a blind eye in regard to our health from cumulative risk of electro-smog pollution.
- ✘ Children have thinner skulls & smaller bodies and can absorb more radiation than adults posing a greater risk of harm.
- ✘ Environmental studies done on previous technologies show harm on wildlife, bees, insects and trees. Including our pets.
- ✘ 5G requires thousands of small cell antennae closer to our homes, inside buildings and public spaces increasing the exposure of wireless radiation at unprecedented levels.
- ✘ 5G is all about big data and will pave the way for advancing the SMART surveillance grid to track and monitor your every move and activity further eroding your privacy, human rights and freedom of movement.
