

MISINFORMATION + CONFLICTED INTERESTS = LOSS OF RIGHTS & FREEDOMS

You're no stranger to the threats facing us and our children. You've been watching these threats unfold during recent times. The rollout of 5G technology will pose another threat to our health and way of living.

5G is all about big data and will pave the way for advancing the total surveillance grid to track and monitor your every move and activity further eroding your privacy, human rights and freedom of movement.

Radiofrequency radiation (e.g. 3G, 4G, Wi-Fi, SMART meters) penetrating our bodies 24/7 without our full informed consent is criminal assault.

Radiofrequency radiation is known to suppress the immune system and can reactivate dormant viruses. This poses an extreme risk of harm to our health, especially to our children, the elderly and other vulnerable groups.

Regrettably, it is all too typical for us to see politicians ignore the real science when it comes to public health. Instead they promote narratives which conflict with established facts.

WE MUST UNITE TO EXPEL THOSE WHO SERVE ONLY TO MISINFORM YOU.

WE DEMAND THE FREEDOM OF CHOICE AND VALID INFORMED CONSENT WITHOUT COERCION.
